In the Claims:

- 1. (original) A closure for a bottle, the closure being dispersible in a aqueous medium, the closure comprising a first component and a second component, each component defining a seal enclosing a volume within the bottle, wherein the dispersion of each component is activated by a different means.
- 2.(currently amended) A closure <u>according to in accordance with claim 1</u>, wherein the first component of the closure is insoluble in water.
- 3.(currently amended) A closure according to claim 1 in accordance with claim 1 or 2, wherein the dispersion of the first component of the closure is triggered by an elevated temperature mechanism.
- 4.(currently amended) A closure <u>according to in accordance with claim 3</u>, wherein the elevated temperature is between 30°C-90°C, more preferably between 40°C-80°C, and most preferably about 50°C.
- 5. (currently amended) A closure <u>according to claim 1</u> in accordance with any one of claims 1 to 4, wherein the first component of the closure comprises a wax.
- 6.(cancelled) A closure in accordance with claim 5, wherein the wax is a paraffin wax or a hydrocarbon wax.
- 7.(currently amended) A closure <u>according to claim 1</u> in accordance with any one of claims 1 to 6, wherein the dispersion of the second component of the closure is triggered by contact with an aqueous medium.
- 8.(canceled)

- 9.(currently amended) A closure <u>according to claim 7</u> in accordance with claim 7 or 8, wherein the second component comprises a water soluble polymer.
- 10.(currently amended) A closure <u>according to in accordance with claim 9</u>, wherein the water soluble polymer comprises <u>a polymer selected from polyvinyl alcohol</u>, polylactic acid, polyvinyl pyrrolidone or a mixture thereof.

11.(canceled)

- 12. (currently amended) A closure <u>according to in accordance with claim 7</u>, wherein the second component of the closure has no or only a limited solubility at a pH-value above 10 and, at a pH-value below 9, has a solubility such that it becomes dissolved.
- 13.(currently amended) A closure <u>according to in accordance with claim 12</u>, wherein the component comprises a pH-sensitive polymer incorporating a repeat unit having a basic function, separate from the backbone chain of the polymer.
- 14.(currently amended) A closure <u>according to in accordance with claim 13</u>, wherein the repeat unit is based on a compound selected from the group consisting of vinyl alcohol derivatives, acrylates and alkyl acrylates having said basic function.
- 15.(currently amended) A closure <u>according to in accordance with claim 13</u>, wherein the polymer is a carbohydrate functionalised with the basic function.
- 16. (currently amended) A closure according to in accordance with claim 13, 14 or 15, wherein the basic function is an amine.
- 17.(currently amended) A closure according to claim 16, in which the repeat unit is based on a compound of formula III:

in which G is <u>a</u> linking group selected from –COO-, -OCO-, -CONH-, -NHCO-, -NHCONH-, -NHCOO-, -OCONH-or –OCOO-,

each R_1 is, independently, hydrogen or an alkyl group with 1 to 3 carbon atoms, each R_2 is, independently, hydrogen or an alkyl group with 1 to 5 carbon atoms, and x is an integer from 1 to 6.

18.(original) A closure according to claim 16, in which the repeat unit is based on a compound of formula IV:

$$c H_2 = C - COO - \left[CH_2\right] - N R_2$$

$$R_2 \qquad (IV)$$

in which R_1 is hydrogen or an alkyl group with 1 to 3 carbon atoms, each R_2 is, independently, hydrogen or alkyl group with 1 to 5 carbon atoms, and x is an integer from 1 to 6.

19.(currently amended) A closure <u>according to claim 1</u> in accordance with any one of claims 1 to 18, wherein the components of the closure are arranged in a two layer structure.

- 20.(currently amended) A closure <u>according to in accordance with claim 19</u>, wherein the closure is disposed within or adjacent to a dispensing aperture of the bottle.
- 21.(currently amended) A closure <u>according to claim 19</u> in accordance with claim 19 or 20, wherein the layers abut against one another.
- 22.(currently amended) A closure <u>according to</u> in accordance with claim 19, wherein a first layer is disposed within or adjacent to a dispensing aperture of the bottle defining a first seal and a second layer is disposed across a lower portion of the bottle defining a second seal.

23.(canceled)

- 24.(currently amended) A bottle for use in a washing machine, the bottle comprising a two component closure dispersible in an <u>aqueous</u> aquous medium, each component defining a seal enclosing a volume within the bottle, wherein the dispersion of each component is activated by a different means.
- 25.(currently amended) A bottle <u>comprising a closure according to claim 1</u> in accordance with claim 24, wherein the closure is in accordance with any one of claims 1 to 23.
- 26.(currently amended) A bottle <u>according to claim 25</u> in accordance with claims 24 or 25, wherein the components of the closure are arranged in a two layer structure.
- 27.(currently amended) A bottle <u>according to in accordance with claim 26</u>, wherein the closure is disposed within or adjacent to a dispensing aperture of the bottle.

28. (canceled)

- 29.(currently amended) A bottle <u>according to</u> in accordance with claim 26, wherein a first layer is disposed within or adjacent to a dispensing aperture of the bottle defining a first seal and a second layer is disposed across a lower portion of the bottle defining a second seal.
- 30. (currently amended) A bottle according to <u>claim 25</u> any one of claims 24 to 26, wherein the bottle has two compartments with each compartment being sealed by a different component of the closure.
- 31.(original) A bottle according to claim 30, wherein the two compartments are formed by a division extending from adjacent a dispensing aperture of the bottle to the base of the bottle.
- 32.(canceled)
- 33.(currently amended) A bottle according to claim <u>25 containing a detergent</u> composition <u>32</u>, wherein a portion of the composition is sealed by a first component of the closure and a second potion is sealed by a second portion of the closure.
- 34.(currently amended) A bottle according to claim 32 or 33, wherein the detergent composition is a machine dishwashing detergent composition.
- 35.(canceled)
- 36.(currently amended) A bottle according to <u>claim 25</u> any one of claims 24 to 35, wherein the bottle comprises an additional sealing means.
